

MOTOR REPAIR & RELIABILITY

1/2-DAY WORKSHOP, AUGUSTA, GA

TRAINING OVERVIEW

Join us in Augusta, GA for an interactive tour / presentation on the best practices for the motor repair industry. There will be a focus on how motor repair practices impact overall motor and equipment run life. Learn what you should expect from your motor repair vendor and how to inspect for the industry best practices. Separate discussion on motor reliability and how extra run life can have an impact.

TOPICS:

- Interactive tour to identify best practices in your motor repair vendor. Live demonstrations of best practices and crucial areas for added reliability.
- How to set standards to ensure every vendor adheres to your requirements. Practical ideas that can be implemented to increase reliability.
- Meet and interact with some of the top motor reliability experts and equipment.

EXPERIENCED INSTRUCTORS:

Chris Grainger

TESTIMONIAL:

"I just wanted to let you know how much we here at Georgia-Pacific Brookneal OSB appreciate the workshops your company hosted last year with the Reliability Center. The topics that were covered led us to begin looking much harder at the quality of motor rebuilds, motor reliability and performance than we ever had before."

-Robert H. Thompson, Georgia-Pacific
