Industrial Matrix Drive U1000

5 to 350 HP

Increase your green space with Yaskawa's Industrial Matrix Drive (U1000), the product that goes beyond conventional drives, providing outstanding harmonic performance and regeneration in a single stand-alone component.

Enjoy extremely low harmonic distortion and regeneration in a space-saving design, completely without the need for additional components. Unlike conventional drives, Yaskawa's matrix technology creates a variable output by switching directly from the input power (no DC bus). Additionally, the Matrix drive is a member of the Yaskawa industrial drive family, and provides the same user experience.
