

PROVEN METHODS TO IMPROVE MOTOR RELIABILITY

TRAINING OVERVIEW

Join us in Raleigh, NC for an educational presentation on motor and equipment reliability. Meet and interact with top reliability experts to learn how Root Cause Analysis (RCA) can eliminate failure mechanisms and increase overall motor and equipment run life. Learn how a proactive motor maintenance approach will cut motor repair costs significantly as well as what you should expect from your motor repair vendor.

TOPICS:

- How basic RCA can improve motor reliability and increase run life.
- Best practices to look for in your motor repair vendor.
- How the Reliability Pyramid affects your motor program.
- Meet and interact with some of the top motor reliability experts.

TESTIMONIAL:

"I just wanted to let you know how much we here at Georgia-Pacific Brookneal OSB appreciate the workshops your company hosted last year with the Reliability Center. The topics that were covered led us to begin looking much harder at the quality of motor rebuilds, motor reliability and performance than we ever had before."

-Robert H. Thompson, Georgia-Pacific
